

Todo list for CSULB friend finder release #2

1. **Powerpoint** presentation (10 to 12 minutes)
 1. **Features implemented** in this release
 2. **Plans** for next two releases (“specific timeline”, “features and the resources assigned to them”)
 3. **Live demo** of the application, (“take up majority of presentation time”)
 4. **Walkthrough** of the source code
 1. e.g., frameworks, libraries, business objects, database
 5. **Q&A**
2. UML diagrams
 1. **Class diagram**
 2. **Sequence diagram**
 3. **Entity-relationship diagram**

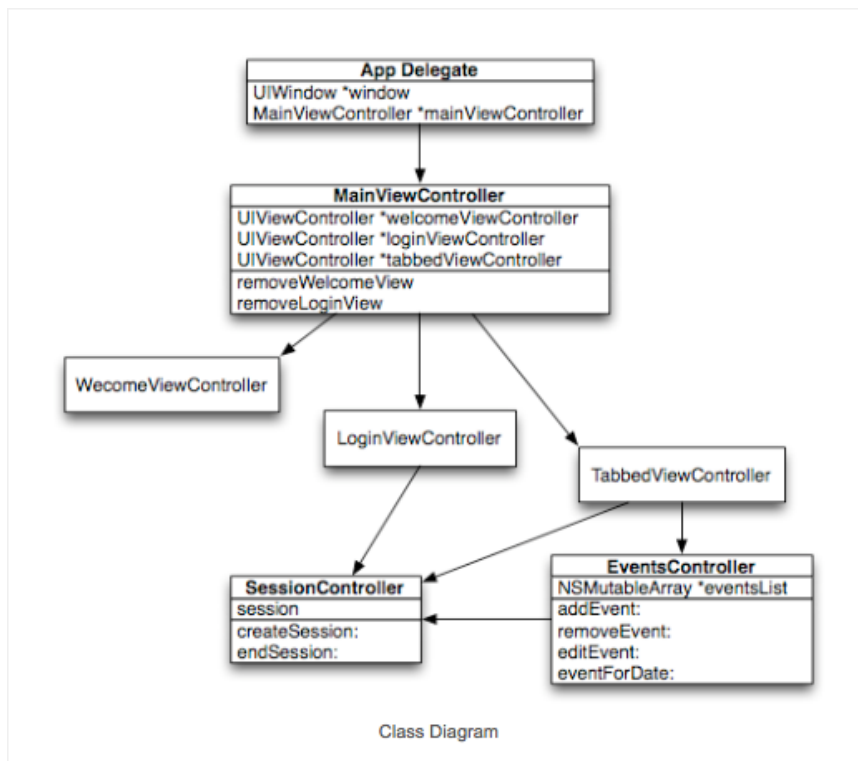

Tan has started files for the UML diagrams on Google Docs. The folder is at:

<http://bit.ly/11P5umt>

Anyone can edit.

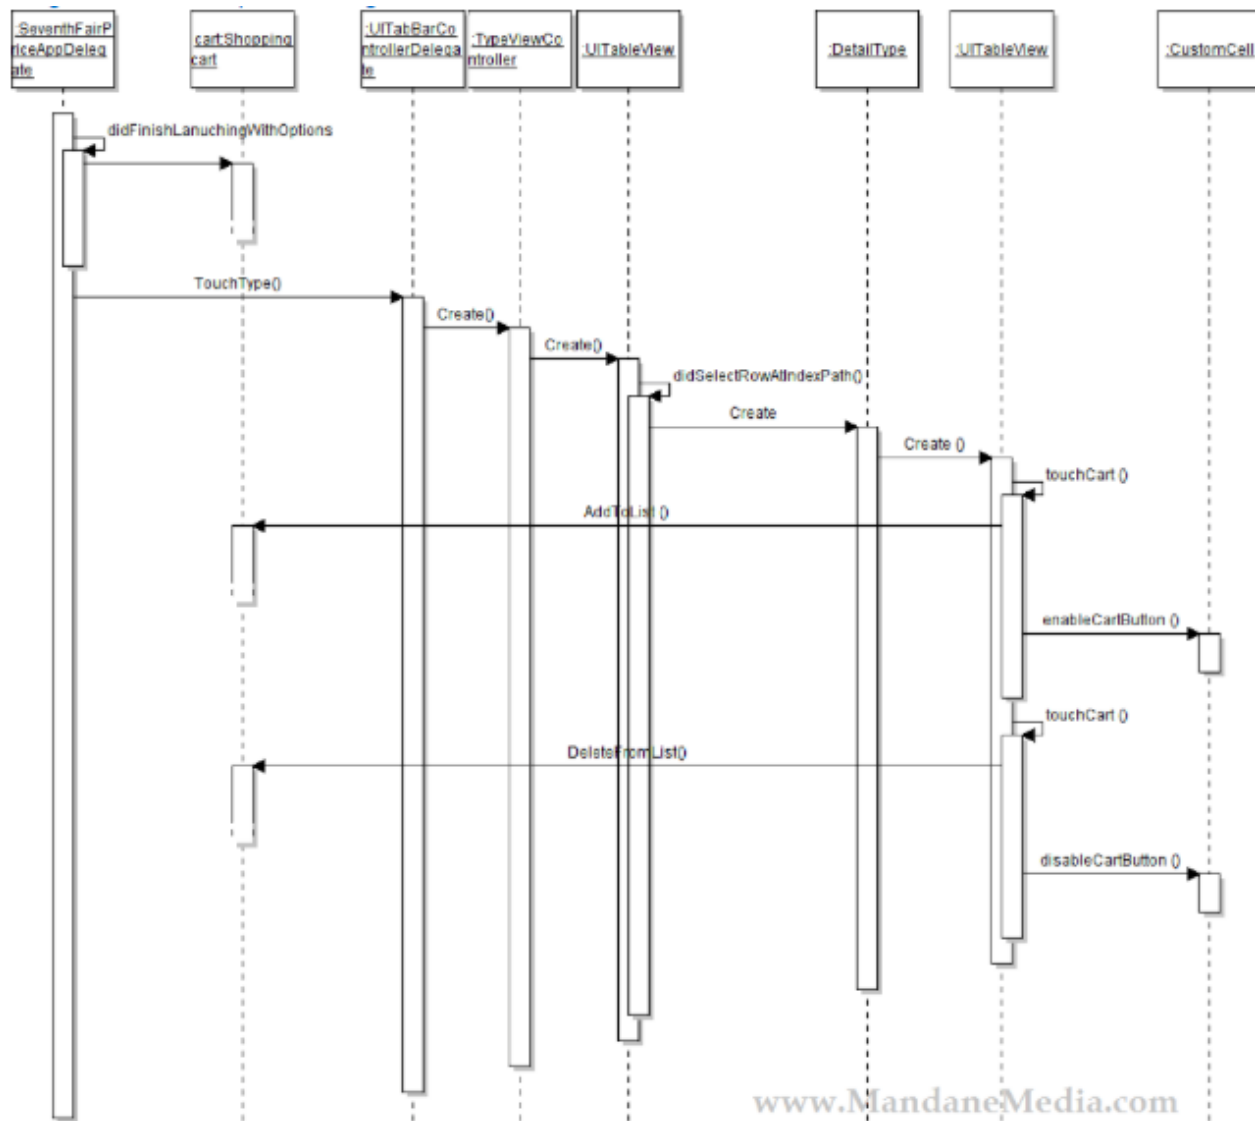

Here’s an example for the **class diagram** (from a blog post:

<http://www.mikeziray.com/tag/class-diagram/>)

Here's an example for the **sequence diagram**:

<http://stackoverflow.com/questions/9116843/how-can-be-improved-these-uml-diagram-for-an-iphone-shopping-cart-application>

Here's an example for the ER diagram (<http://www.apeth.com/iOSBook/ch19.html>):

(but the child/presented relationships are specific to this author. Maybe you'll just want to keep the usual (has, is-a, etc.).

To make this relationship on your own, check the header files of each view controller. Diagram the superclasses they **implement** and the delegates (interfaces) they **interface**.
